

## We are Alaska's Health Information Exchange

You are dedicated to excellent patient care and improving health and wellness in Alaska.  
You are committed to your business operations and success of your organization.  
You can **save money and time**, and **improve patient care**  
by participating in Alaska's health information exchange.

- We connect hospitals, health systems, payers, patients, private practices, and other members of the healthcare ecosystem.
- We are an unbiased, non-profit organization linking providers to information to help make informed decisions for best possible outcomes.
- We help you share and receive important patient health information to ensure every Alaskan gets the right care at the right time.
- We implement services and technologies to allow care providers to make informed decisions for the best possible outcomes.

## healtheConnect Alaska ...

- facilitates coordinated patient care
- improves quality and safety of patient care
- reduces duplicative treatments & redundant testing
- allows easier deployment of emerging technology & healthcare services
- helps avoid costly mistakes
- eliminates unnecessary paperwork
- facilitates public health reporting & monitoring
- provides a basic level of EHR interoperability

- healththeHUB is a unified landing page and web-based query portal that integrates best-in-breed applications, services, and other health information exchange data sources on one platform.
- For most providers, healththeHUB will embed directly into their EHR, allowing a single-sign-on to query the HIE and all associated data without logging in and searching for the patient twice.

## healththeHUB includes these services:

**SELECT PATIENT INFORMATION:** Patient care snapshots offer the ability to view patient encounter history, pertinent demographics, CCDs, allergies, immunizations, etc.

**eHealth Exchange ACCESS:** Connect with a national network with clinical data from 100 million+ patients and from Medicare & Medicaid, DoD, Social Security and the VA.

**PROMPT (Proactive Management of Patient Transitions):** Search for and view consolidated information for patients in Accountable Care Organizations (ACOs), or in specific care-management programs.

**MEDICATION FILL HISTORY:** Access comprehensive reports with drug name and form, dispense quantity, SIG information, prescriber, fill date, data source, and supply.

**PDMP (Prescription Data Monitoring Program):** Get access to statewide database with prescribing detail, overdose alerts and notifications in context, in healththeHUB or pushed into your EMR workflow.

**ENS (Event Notification System):** Get real-time, actionable data from Admit, Discharge, Transfer alerts created within hospital systems and sent directly to providers when a match is made with their patient list.

## Services available a la carte:

**DIRECT SECURE MESSAGING:** a HIPAA and HITECH compliant, first-class DSM solution that is ONC certified and exceeds standards for reliability, and works with Outlook and other popular email systems.

**SECURE TEXT MESSAGING:** TigerConnect is an encrypted, HIPAA-compliant platform for secure communication between enrolled parties. TigerFlow integrates with many scheduling programs, offers role-based notifications and on-call support, and provides the ability to communicate securely with anyone.

**IMAGE SHARE & EXCHANGE:** Install a small piece of software on your PACS, and your medical imaging producing departments can easily share diagnostic-quality images with any other provider, and store images in the cloud.

**LAB ORDERING & RESULTS:** Place lab orders and receive results to your EMR or through our lab portal. Results are matched up with the original order and the application is configured to each provider's workflow.

Coming in  
early 2019:

Direct Secure Messaging and secure texting through healththeHUB portal  
Light analytics ● Consent management tool ● Behavioral health data
